

# Test File 1

author's name

Let's include a figure.

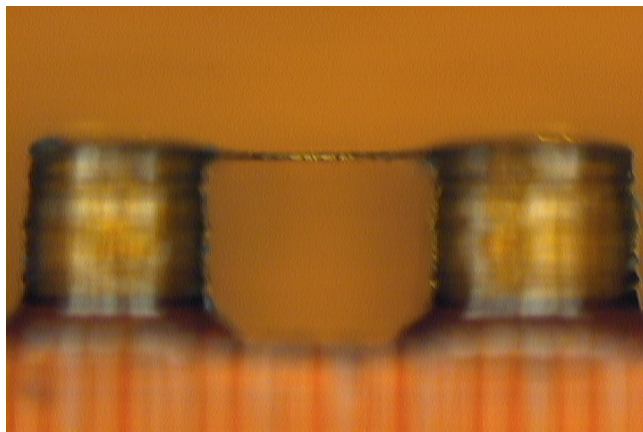

Figure 1: Measured  $h_a$  and  $T_c$  of different resins.

And now we'll reference it as Fig. 1.

See answer to this question for how to reference a figure in another file: <http://tex.stackexchange.com/q/111111/111111> referencing-between-different-files. Now we will reference the figure in the other file:

Fig. S1, ESI<sup>†</sup>.
